

उत्तर रेलवे/NORTHERN RAILWAY

प्रधान कार्यालय /Headquarter Office,
बड़ौदा हाउस/Baroda House,
नई दिल्ली/New Delhi.

सं:/No.219-W/1/Maint/2014-15.

दिनांक/Date:- 24.10.2014

Sr. Divisional Engineer (C),
Northern Railway,
DLI, FZR, LKO, MB & UMB.

विषय/Sub:- Inspections Schedule for work sites.

1. During recent derailment on a work site, it has been observed that safety of the track is not monitored / ensured. This is generally left to JE(P.Way) deputed for the work. It is understood that ADEN and the sectional DEN /Sr.DENs inspect the work site only during normal scheduled inspections. Further during interaction by CTE, with JE/P.Ways, from all over Northern Railway on 08.10.2014, it has been observed that inspecting officers spend only few minutes at work site without going into details of quality/safety aspects.
2. You will appreciate that the work site inspections should be exclusive and not to be clubbed with other inspections. Officers should devote time on work site to educate supervisors/staff for ensuring quality/safety and other related issues. Their observations/instructions should be recorded in the Work Site Register.
3. Inspection schedule:-

Henceforth, the work sites shall be inspected in detail by SSE/P.Way Incharge & ADEN at least once in a fortnight and by sectional DEN/Sr.DEN, at least once a month during execution of the work. In addition work site shall also be inspected prior to actual start of work for proper planning and putting in safety measures by Sr.DEN/DEN.

Kindly acknowledge the receipt of this letter.
